The high-speed flexo ruling machine is a highly sophisticated solution for the fabrication of staple pin exercise books, ruled and unruled pre-products, folded sheets, or other specific finished products. From reels to sheets, it can be used for medium and large runs. It includes a single reel stand, flexo ruling, cross-cutting, overlapping, collecting and counting, sheet feeding, collecting of exercise book stacks, and straight-on delivery. This is an ideal machine for binding notebooks, thread sewing notebooks, protecting myopia exercise books, wire spiral notebooks, and account books.

Core Advantages of Servo System 伺服系统核心优势

- 提升运动控制的精度、效率与稳定性，同时能适配更复杂的工况需求。
- Core Advantages of Servo System It enhances the precision, efficiency and stability of motion control, while being adaptable to more complex working conditions.

Counting unit 数页单元

数页采用伺服电机驱动，更换集纸张数只需在触摸屏上设置即可完成，彻底改变传统更换挂轮的方式，操作简单、快捷。

The counting unit adopts a synchronous servo motor and precision planetary reducers. Customers can modify the sheet's number through the touch screen without changing the hanging wheel gears, which is simple and easy to operate.
